

**WE CONCERNED GROUP OF SCHOLARS AND EMPLOYEES OF
THE
INSTITUTE FOR CONTEMPORARY HISTORY
DECLARE OUR SUPPORT FOR
DEMANDS OF STUDENTS, EDUCATORS AND CITIZENS**

We hereby declare in support of justified demands for complete truth about tragic events in Novi Sad and for bringing to justice those responsible. We are demanding the following systemic reforms:

- Against endangerment of basic human and civil rights, including the attempts of spreading fear through threats and blackmailing.
- Against corruption and in favor of decisive action against corruption and criminal activities, in which numerous representatives of the government are involved.
- For improvement of educational system and position of educational workers.
- For the protection of the freedom of the media and the right of the citizens to be objectively informed about current events.
- For the end of partocracy based on intimidation and terror, which has been spread to the point where it encompasses all spheres of our society and reality.

It is our firm belief that it is our duty to demonstrate support and solidarity towards young people that have been, for months now, engaged in fight for justice and freedom, and that this struggle is of crucial importance for creating a society without fear. Through participation in these protests, scientists and educational workers of Serbia strive to preserve honor and dignity of their professions. It is the call of the intellectuals and scientists to refuse to bow down in the times of hardship and struggle, but to raise their voice in support of the efforts made by free thinking citizens in favor of the rule of law and systemic reforms in Serbia, for it is the only way for our society to change for the better.
